

ARJUN PRAKASH MENON

Junior AI Engineer

Bengaluru, Karnataka, India | +91 98450 22671 | arjun.p.menon2003@gmail.com | linkedin.com/in/arjunpmenon | github.com/arjunpmenon

PROFESSIONAL SUMMARY

Junior AI Engineer with hands-on experience building and deploying machine learning and NLP models through internships and academic projects. Proficient in Python, PyTorch, and scikit-learn, with practical exposure to LLM fine-tuning, RAG pipelines, and REST API development using FastAPI. Strong foundation in data structures, algorithms, and applied statistics from a B.Tech in Computer Science with specialization in Artificial Intelligence. Eager to contribute to production-grade AI systems in a fast-paced engineering team.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, Java, JavaScript
- ML/DL Frameworks: PyTorch, TensorFlow, scikit-learn, Keras, Hugging Face Transformers
- AI/NLP: LLM fine-tuning (LoRA), Prompt Engineering, RAG pipelines, LangChain, spaCy
- Data Tools: Pandas, NumPy, Matplotlib, Seaborn, OpenCV
- Backend & APIs: FastAPI, Flask, REST APIs, Docker
- Databases: MySQL, PostgreSQL, MongoDB, Pinecone (vector DB)
- Tools & Platforms: Git/GitHub, Jupyter, VS Code, AWS (EC2, S3), Google Colab, Linux

EXPERIENCE

AI Engineering Intern — Nimbus Analytics Pvt. Ltd., Bengaluru

Jan 2026 – Jun 2026

- Built and fine-tuned a text classification model using DistilBERT that improved support-ticket routing accuracy from 78% to 91% across 5 categories.
- Developed a Retrieval-Augmented Generation (RAG) chatbot over internal documentation using LangChain and Pinecone, cutting average query resolution time by 35%.
- Wrapped model inference in a FastAPI service, containerized it with Docker, and deployed it to an AWS EC2 instance for internal testing.
- Wrote unit tests and set up basic CI checks with GitHub Actions, reducing regression bugs reported by QA by 20%.

Machine Learning Intern — CampusCode Labs, Remote

May 2025 – Jul 2025

- Cleaned and preprocessed a 50,000-row customer churn dataset using Pandas and NumPy, handling missing values and class imbalance with SMOTE.
- Trained and compared Logistic Regression, Random Forest, and XGBoost models, achieving an F1-score of 0.84 with the final tuned model.
- Presented findings to a team of 4 engineers using visualizations built in Matplotlib and Seaborn, supporting a data-driven product decision.

ACADEMIC PROJECTS

Digital Twin Agent for Classroom AI Concepts (Capstone Project)

2025

- Designed a conversational digital-twin agent that simulates real-world sensor and process data to teach AI/ML concepts interactively to students.
- Integrated a local LLM (via Ollama) with a custom tool-calling layer using LangChain's MultiServerMCPClient for dynamic tool addition.
- Built a lightweight FastAPI backend and a simple web UI, used by over 100 students during a 5-day AI training workshop.

Handwritten Digit and Sketch Recognition using CNN

2024

- Implemented a Convolutional Neural Network in PyTorch achieving 98.6% test accuracy on the MNIST dataset.
- Applied data augmentation and dropout regularization to reduce overfitting, improving validation accuracy by 4%.

Resume Screening Tool using NLP

2024

- Built a resume-to-job-description matching tool using spaCy for entity extraction and cosine similarity on TF-IDF vectors.
- Automated the ranking of 200+ resumes against a job description, reducing manual screening effort by an estimated 60%.

EDUCATION

B.Tech in Computer Science and Engineering (Specialization: Artificial Intelligence)	2022 – 2026
Dayananda Sagar College of Engineering, Bengaluru CGPA: 8.6 / 10	
Class XII (CBSE)	2022
Kendriya Vidyalaya, Bengaluru 91.2%	

CERTIFICATIONS

- Deep Learning Specialization — DeepLearning.AI (Coursera), 2025
- Machine Learning with Python — IBM (Coursera), 2024
- AWS Certified Cloud Practitioner, 2025

ACHIEVEMENTS & EXTRACURRICULARS

- Winner, Smart India Hackathon (College Round) 2025 — built an AI-based crop disease detection prototype.
- Core member, College AI/ML Club — conducted weekly workshops on Python and machine learning for 50+ junior students.
- Published a technical blog on RAG pipeline design with over 3,000 reads on Medium.
